# SILO-WHIP SYSTEM

## The most powerful silo whip system ever built!

The SiloWhip System is an all hydraulic powered silo cleaning system. Working from an opening on the top of the vessel, the SiloWhip System will effectively clear obstructions and sweep down different sizes and styles of bulk storage containers - all with no need for confined space entry.

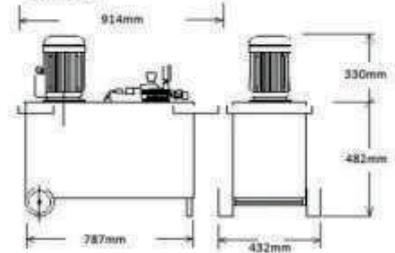

Once set up the SiloWhip System can be maneuvered around inside the silo to knock down material that is built-up. Movement of the boom up and down, side to side allows you to position the cutting head at the build-up, while the hose reel moves the head up and down.

## SILO-WHIP Dimensions and Weights

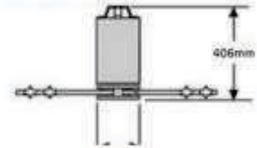

**Hose Reel (136 kg)  
Manifold Unit (21 kg)**

**Power Pack  
135 kg**

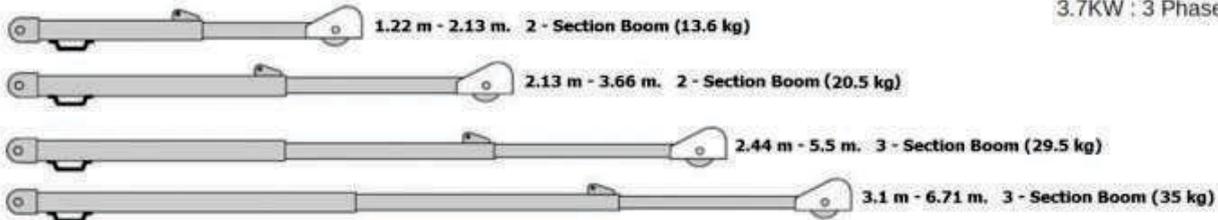

**Cutting Head Assembly  
(25 kg)**

Electrical Power requirements (all)  
415+/-10% Volts: 50+/-5% Hz:  
3.7KW : 3 Phase

## Telescopic Boom Assemblies

## Attachments

### SWEEP WHIP SETS

UHMW PLASTIC-COATED POLYESTER  
SUITABLE FOR SWEEPING VESSEL WALLS OF RESIDUE  
NON SPARKING & DISSIPATIVE TO PREVENT STATIC BUILDUP

### KNUCKLE WHIP SETS

UHMW PLASTIC-COATED POLYESTER CONTRUCTION  
KNUCKLES FORMED FROM UHMW FOR ABRASION RESISTANCE  
SUITABLE FOR CLEARING ALL TYPES OF MATERIALS

### CHAIN WHIP SETS

**BRONZE** (NON-SPARKING) CONTRUCTION  
SUITABLE FOR CLEARING ALL TYPES OF MATERIALS

**STEEL** (LONGER WEARING)  
SUITABLE FOR CLEARING ALL TYPES OF MATERIALS  
WHERE SPARKING IS NOT PROHIBITED
